

CT Scanner Purchasing Overview

An overview of general and specific questions that you should ask yourself during the CT purchasing process. The entire process can take from 1-6 months and we will guide you every step of the way.

Before starting the buying process:

- When do you need the system to be up and running?
- When can you have the site ready?
- Is the financing in place?

- Will this be the only CT in the clinic?
- If no, what is your reason for getting this one?
- How many patients will you scan pr. day?
- What type of examinations are you doing?
- Do you need specific software options?
- Do you need accessories e.g. an injector?

Considering Your Needs (1-3 weeks)

Discuss your setting with us and figure out what kind of system might fit you (or your customer).

Budget and Model (1-3 weeks)

Which exact models and options fit your balance of needs and budget (or your customer's).

- Which brands offer service in your area?
- Do you have any brand preferences?
- What is your budget for a system?
- Do you need installation?

Sourcing the System (1-2 months)

If your model of choice is not in stock, we need to set aside time for sourcing, delivery to LBN, testing, and shipping.

- Is the room ready?
- Do you have lead in the room?
- What is the size of the room?
- Do you have a stable water supply?
- Do you have a stable power supply?

Regarding Site (0-2 months)

Is the room ready for the CT? Preparing a room from scratch can take 1-2 months.

Storage of the System (1-3 months)

You have the option to store your system at our warehouse for 1-3 months at a small fee.

Delivery and Installation (2-4 weeks)

Depending on the method of shipment and the distance to us, it can take up to 1 month. Installation usually only takes a couple of days.

- Does your country require CE mark/FDA/ Other?
- Any import restrictions we should be aware of?
- Do you, or should we, handle the shipping?
- Is it you, or us, who handle installation?
